CYBER-TECH, INC

Industrial Control Solutions

ABOUT CYBER-TECH, INC.

Cyber-Tech designs and manufactures custom industrial grade control handles and joysticks with a consistent reputation for being rugged and reliable, while delivering a level of customer service that is superior in the industry. We strive to achieve total customer satisfaction in a number of ways. Our industrial grade products are **custom configured** to meet your specific operational requirements at prices comparable with our competitor's off the shelf products. All of our controllers can be **identified with OEM part numbers and logos** which allows large industrial equipment manufacturers to integrate Cyber-Tech's products into their proprietary lines. Every one of our industrial grade controllers are 100% functionally and electrically tested prior to shipment.

We include a **lifetime warranty** on every industrial grade control housings and an extended warranty on parts and labor. Additionally, we offer same day, expedited delivery on custom configured products and spare parts ensuring that your downtime is minimal. We understand that downtime is expensive so we strive to do everything possible to keep our customers fully operational.

Cyber-Tech's commitment to quality has received considerable attention from other companies, which has often copied our products. Unfortunately they cannot match our quality customer service and extended warranties.

Cyber-Tech handles and joysticks are sold globally to some of the largest equipment manufacturers in the world including the United States military. Custom configurations and unique build procedures have allowed Cyber-Tech handles to be integrated into even the most specific application. In the twenty-five plus years since our start in Oregon, Cyber-Tech's custom built handles and joysticks have been integrated into a variety of equipment ranging from mobile vehicle to elaborate aero space machinery and virtually everything in between.

Call our experienced customer service representatives and see how we can make your industrial equipment more reliable and productive.

ENGINEERING SERVICES

SYSTEM ENGINEERING: Cyber-Tech offers a total systems engineering service to assist you in solving your equipment control requirements. With over 32 years of experience in the field, we have assisted many equipment manufacturers and end-users in solving very complex control issues. Our level of engineering is from drafting to PE.

CUSTOM BOARD DESIGN & INTERFACING: We also offer custom circuit board designs and special interface packages to meet your special requirements.

ADAPTORS

Throughout the years we've encountered thousands of unique and highly custom applications which have allowed us to develop a rather complete line of mounting adaptors and many one-offs. We manufacture and stock straight and angled studs in both SAE and Metric male threads and female adaptors with internal threads up to 5/8" / 12mm.

HANDLE & JOYSTICK COMBINATIONS

All Cyber-Tech control handles and joysticks units are engineered to be integrated together. Whichever grip you select can be factory or field mounted directly to any Cyber-Tech joysticks. Have a different manufactures handle or joystick? Not a problem. We offer a complete line of adaptors that will allow you to update your current controls.
